Sinopse

Weary River is a 1929 American romantic drama film directed by Frank Lloyd and starring Richard Barthelmess, Betty Compson, and William Holden.[1] Produced by First National Pictures and distributed through Warner Brothers, the film is a part-talkie, part-silent hybrid made at the changeover from silent movies to sound movies. Based on a story by Courtney Ryley Cooper, the film is about a gangster who goes to prison and finds salvation through music while serving his time. After he is released and falls back into a life of temptation, he is saved by the love of a woman and the warden who befriended him. The film received an Academy Award nomination for Best Director in 1930.
