Sinopse

Raw, uncensored, revealing, “Who the F**K is Arthur Fogel?” is the insider story of today’s multi-billion dollar pop music industry that is struggling to survive the meteor-like impact of massive technological change that has affected it like no other business on earth...and one man at the centre of the cyclone, Arthur Fogel. “Arthur knows how to make the impossible possible,” claims Madonna. “He’s a touring genius.” Bono says Fogel is “the easiest person in the world to deal with and make a deal with. Nothing is a problem.” Sting says “First and foremost, he’s a musician. He’s a drummer...I think when you’re dealing with artists as a musician, you don’t need to push your weight around...you have a quiet confidence that’s about having mastered an instrument...I always feel he treats us as fellow musicians, rather than pieces in his business game.”
